>LACE FIT FOR A QUEEN.

two years in the making, four expert lace. lish, makers being constantly employed at the task. It is a bridal vestment, very nearly is elaborate as the gift of the women of Belgium to the Princess Stephanie on the occasion of her marriage, the \$5.000 price of which was raised by popular subscription, 5 francs being the maximum amount

When time was little and money less in affairs of men and women lace-making had its birth and its development. But he machine came along with its economies and the popular opinion then asked. "What se of perfect handwork when the machine, much more cheaply, turns out a quality only a little less perfect?"

So even the lovers of genuine needle

In England, the machine holds sway: ir rance, maching-made nets, upon which the designs are woven by hand, predominate; in other countries, economies at the troduced. Very few lace-making centers follow the old, slow and painstaking method which takes a year to the piece that could be superficially duplicated by achine in half a day.

Belgium is one of the exceptions to the Belgium still is a lace-making and lace-loving country, as it was two and more centuries ago. The traditions of the craft are alive; daughter is taught the art by mother and the secrets of the arvelous handiwork are handed down in milies. It were invidious to say that the lace of Brussels is the most exquisite dern laces, but undoubtedly connois asider it of the first-class.

hibit of laces in the Belgian building acquires a superlative interest. Apart from e beauty of texture and fabric, it is the of an activity important phases which had their origin in the Netherwhere nuns, as a pastime from the my of convent life, first made the or "bobbin" lace, a kind that often

wage for the work; the usual pay is about the work of hand right; you only half do."

the making of one among the most treasured of art-craft productions gets very little out of it. The natural result is "If an American can make is or is that no sufficiently intelligent persons of the cities of Belgium, or those who can there be any inducement."

in the Belgian building required more than a picturesque mixture of French and Eng-"The dealers take the materials work when they are not occupied with

something else. In the small rural communities the skill attained is fully equal to that of any past period. There they work with the same patient industry and persistent aim at perfection which was true of their ancestors long ago."

Modern laces often have figure-patterns worked upon the fabric. One of this type to which the Belgians at their building point with pride is a small piece of black Chantilly on which a theme is worked out, "The Coming of the Morning."

The netting or background is of such point lace are admitting that the art extreme delicacy that the interstices almost defy the eye, yet all was done with the needle-point-with needle and thread, much as one sews. Over it are worked numerous tiny cupids and the effect of clouds. The richness of the result could

> "It is not quick-lunch work." said Mr. Vauthier, the Belgian Art Commissioner, when I was marveling over the time and patience given to the making of so small a thing as this lady's collaret. "Neither are we quick-lunch people."

> "You know, all that we Europeans can hope to introduce successfully in America is the art work. Either you don't have the time to do it or you cannot do it. But the fact is that you never finish anything. so that when you see European workman-ship you marvel, admire and often buy, because it is more thorough than any you have seen before.

> "Now look at these little statuettes. (He pointed to ivory carvings which are beside the lace display.) It is the same as with the lace. See how complete they are; how carefully the artist must have worked to shape the result out of one piece. It is true that this is encouraged with us; the King gives the ivory to the artist to encourage him in this kind of what is worth doing at all is worth doing thoroughly and well."
>
> Mr. Vauthier became quite excited as he

JAPANESE FIND

#### A WIRELESS STATION USED BY RUSSIANS.

Tokio, June 5, 4:30 p. m.—It is suspected here that the Russians at Port Arthur are communicating with points on the Chinese coast by means of wireless telegraphy. It was reported that a wireless station had been erected secretly at the village of Peh-Wang, on Takin Island, one of the Miao-Tao group, situated in Pe-Chi-La Strait, and the Japanese cruiser Chitoso visited the island yesterday to investigate. She did not, however, find anything. It is reported that another such station has been erected near Shan-Hal-Kwan, and the Japanese are investigating this mat-

Yesterday the Chitose steamed close to into Liaote Shan promontery and discovered four masts and a watchhouse near the coast. One of these masts evidently was fitted for wireless telegraphy operations. The Chitose reports having heard a series of explosions at Port Arthur and believes them to have resulted from biastings preparatory to the emplacement of new batteries.

RUSSIANS REPULSED BY INFERIOR NUMBERS

WITH HEAVY LOSS.

ion, June &-The Daily Telegraph's London, June 8.—The Daily Telegraph a Tientsin correspondent wires:

"Four thousand Russians belonging to Gereral Stakelberg's brigade on May II attacked 1,500 Japanese occupying a position five miles south of Wafangtien. The Russians were repulsed, losing 201 killed and 400 wounded. The Japanese lost more than 100 killed."

WHO DRAW REVOLVERS. Ossenfort saw a man throw a rock and fought his way through the crowd until

he reached and grabbed the offender, whose associates declared that he should not be arrested.

They charged on Ossenfort. Holding his prisoner with one hand he drew his revolver, as did Rozier Meigs and other officers of the Humane Society, who came up to assist him.

At the sight of the revolvers the crowd started in every direction and in the confusion some fell and were trampled upon. The panic was only for an instant, however. The crowd returped and sgain demanded the release of the rock thrower. Ossenfort walked to a point near the railroad tracks and, on his promise to depart immediately, turned him loose, as there was no one to take him to Clayton. The mob had by this time returned to the office and grand stand.

Inside the grand stand the mob smashed the chairs in the boxes as fast as they could pick them up, and then threw the pieces into the center of the arena. In addition they smashed the railing around the boxes.

the boxes.
Deputy Sheriff Bellairs and Deputy
Constable Bode rushed into the stand to
stop the destruction. The micreants
would flee when they saw the officers coming while the crowds in another part of
the stand would begin hooting and in still
other places resume the work of destruction.
